Dispenser Display XL

XL Techniques has developed an **efficient display for fuel dispensers**, entirely conform to the needs of the customers: a new design and a clear graphical Display, with the facility to integrate customized information.

Our display is compatible with all current fleet management systems and can be integrated in every type of fuel dispenser.

Technical Features

CD fuel display with backlight:

- Liquid-crystal display, integrated electronic totalizer, with option to enter and to display the fuel type.
- Report of the pulser
- Timing of the hang out / replacement of the nozzle
- Option to display a welcome message
- Easy to use
- Competitive

Dimensions: 180 x 120 x 45 mm

Use of the dispenser display in private and industrial area only.
The resale of fuel in the public area with this display is prohibited.
